

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

BIENNIAL REPORT

OF THE

STATE AUDITOR.

Office of State Auditor,  
Salt Lake City, Utah, Nov. 30, 1906.

To His Excellency,  
John C. Cutler, Governor of Utah:  
Sir:—

In compliance with the provisions of Chapter 12, Laws of Utah, 1905, I have the honor to submit herewith a report of the operations of this office for the fiscal years ending November 30, 1905, and November 30, 1906.

The tabular statements exhibit the financial transactions of the State for the biennial period named; showing in detail its source of revenue, public expenditures, also showing the amount of each appropriation for the calendar years 1905 and 1906; the amount expended, and the balance, if any, together with a detailed estimate of the expenditures to be defrayed from the treasury for the two ensuing calendar years, and also the estimated revenue of the State for the same period.

The report of the State Auditor is so largely made up of tables and figures that, ordinarily, it fails to engage the attention of the taxpayers of the State or of their representatives in the Legislature. A careful study and comparison of these reports would, however, furnish to every

Received 5.27.29 MVK. Utah State

citizen of the State abundant reasons for pride as well as material for reflection.

It is gratifying to be able to mention that there has been a substantial increase in the amount of assessed property for the past seven years. In 1899 the aggregate of assessments for taxation was \$99,343,199. In 1906 it has increased to \$145,995,949, a gain of sixty-eight per cent, and may be reasonably expected to continue as long as our present prosperous conditions prevail.

This increase can be attributed to the agricultural and industrial growth and generally improved business conditions now apparent throughout the State.

While this record is a source of gratification and can be commented upon, it is also evident that the ordinary demands upon the revenue fund are increasing more rapidly; particularly is this noticeable in the increased demands made by some of the controlling boards.

The appropriations of the last Legislature, added to those provided for by enactment, were slightly heavier than the fund could bear, but we were able to meet and pay every demand notwithstanding. We were greatly aided in this matter, however, by the liberal use of the latitude given by Chapter 8 of the Session Laws of 1899, which authorizes the State Board of Loan Commissioners to borrow money, temporarily, when there are no available funds in the State Treasury.

From estimates furnished by the heads of departments and the various managing boards, together with those fixed by standing laws, it will require approximately \$2,491,177.18 to cover the cost of maintaining the State Government for the next biennium; while the total estimated revenue from all sources for the same period amounts to \$1,767,623.61, showing an excess of demands over estimated revenues of \$723,553.57.

It needs no urging upon the part of the executive branch of the government to show the necessity of limiting appropriations to the amounts indispensably necessary for the maintenance of the State and its institutions.

## PUBLIC DEBT.

The following table shows the total bonded indebted-

ness of the State to be \$900,000, represented by a series of bond issues, each series maturing twenty years after date, as follows:

Series No. 3, dated July 2, 1892, at 5 per cent. . . . \$250,000  
 Series No. 4, dated July 2, 1896, at 4 per cent. . . . 200,000  
 Series No. 5, dated Sept. 1, 1898, at 3½ per cent. 150,000  
 Series No. 6, dated July 1, 1900, at 3¼ per cent. . 300,000

All legislative acts authorizing the several bond issues require a redemption fund aggregating sums equal to ten per cent of the issues, to be set aside annually, at the expiration of ten years after the date of issue.

Before the close of the year 1906, \$100,000.00 will have been set aside to meet the issue maturing in 1912. Beginning with the year 1907 and annually thereafter it will be necessary, as provided, to set aside the sum of \$20,000, as a redemption fund to meet the second issue of bonds maturing in 1916.

Upon the recommendation of my predecessor in office, the Legislature of 1903 passed an act authorizing the State Board of Loan Commissioners to invest the redemption fund to take up the issue maturing in 1912 in State, county, municipal, or school district bonds of this State. The greater part of the said fund has been invested as provided.

I would recommend that suitable provisions be made for the safe investment of the fund to meet the issue maturing in 1916.

## EXAMINATION OF ACCOUNTS.

In accordance with the enactments of the last Legislature the examination of the accounts of the State institutions and those of the State with the several counties so ably begun by my predecessor, has been continued with success, resulting in obtaining a uniform system of keeping county records throughout the State, in collecting several thousand dollars from dilatory officials and in unearthing many mistakes in redemptions, juror and witness fees, and in salary accounts in which the State has invariably been the gainer.

Upon assuming the duties of the office two years ago and upon visiting, by deputy, the counties and auditing

their books, it was found in a number of them no accounts of the State's funds were kept, and the County Auditors in such cases had no check against the Treasurers. Errors were also found in the method of entering "subsequent" taxes.

Proper examinations and suggestions have brought about the required changes.

### UNCOLLECTIBLE TAXES.

There should be some legislative enactment by which the State and the other taxing funds should not be compelled to lose, annually, large sums of money upon personal property.

During the year 1905 the several County Auditors reported to this office an approximate total of \$40,000 "uncollectible taxes," the amounts ranging from a few dollars to several hundred. The present law provides that at the time of making the assessment, or any time thereafter, the Assessor in his discretion may collect the taxes on any personal property. If this law was amended to make it the duty of the Assessor at the time of making such assessment to collect the taxes, unless real estate ample to secure the same is liable, or unless security be given that the taxes will be paid when due, such a change would not only prevent the loss of the greater part of the \$40,000 "uncollectibles," but would also be a saving in the expense of collecting.

### REDEMPTIONS.

I respectfully suggest that a change be made in the law relating to the redemption of lands heretofore sold for taxes. As the law now is, a redeemer or purchaser, no matter how poor the land, must pay the taxes for each year since the land was sold, including the year of sale, together with the costs of sale and the accrued interest. This is sometimes more than the land is worth. If the County Commissioners were authorized to allow redemptions or to sell such lands at a fair price, redeemers or purchasers could be found who would take the lands and the money would be apportioned to the different funds,

and hereafter the property would be listed and taxes collected, increasing thereby the State's revenue.

### ANOTHER CHANGE.

Along these same lines I would further suggest that Chapter 76, Laws of Utah, 1905, be amended by striking out the last clause, "the county being deemed the purchaser thereof," etc., and inserting in place thereof, "and the money received therefor shall be apportioned as provided in case of redemption." Said section precludes the State, cities, towns and school districts from participating in the proportion of funds derived from the sale of such lands.

### DESTRUCTION OF WILD ANIMALS.

The Legislature of 1901 passed an act providing for the destruction of certain wild animals and appropriated therefor the sum of \$10,000 annually.

The succeeding Legislature slightly amended the said law by increasing the bounty as a further inducement for the destruction of these obnoxious animals, but did not increase the appropriation.

As mentioned in former reports, the operation of this law, during the earlier period at least, was highly successful, and under the amended period it became very noticeable that the annual appropriation was insufficient to meet the growing demands, which resulted in the State Auditor being compelled to file away many thousands of dollars' worth of unredeemed certificates, and give his receipt therefor.

During the early period of the year 1905, and while the Legislature was yet in session, it became very apparent that the bounty laws were being grossly violated, and that many certificates were being illegally or fraudulently procured or issued.

The Legislature, grasping the situation, at once adopted House Concurrent Resolution No. 1. instructing the State Auditor to immediately, for the information of the Legislature, demand from the County Clerks of each county in the State of Utah, a statement covering the

period from March 26, 1901, to January 20, 1905, showing the number and amount of every certificate issued under the provisions of Chapter 137, Laws of Utah, 1901, and Chapter 48, Laws of Utah, 1903.

This investigation disclosed the fact that there were outstanding and unpaid certificates to the amount of \$54,-852.00, which was reported to the Legislature. A law was enacted requiring all persons having in their possession any of the aforesaid certificates to file the same with the State Auditor on or before May 1, 1905.

The State Auditor was further required to examine all the certificates so filed and those on file in his office, and to make a thorough investigation as to the conditions under which they were issued, and subsequently report his findings to the State Board of Examiners.

Your Excellency is familiar with the general requirements of this law and I need not further elaborate other than to state that the sum of \$25,000.00 was appropriated to apply on the aforesaid certificates.

At the present time there are certificates outstanding and unpaid issued under the aforesaid laws amounting to about \$30,000. This deficit I have included in my estimate of the requirements of the State for the years 1907-1908.

The Legislature of 1905 enacted a law to further encourage the destruction of certain wild animals and appropriated therefor the sum of \$10,000 annually out of the general revenues of the State.

During the period of time this law has been in operation it has shown satisfactory results, the appropriation having been sufficient to meet the required demands, there remaining an unexpended balance for the year 1905, and it is very probable that a balance will be covered into the treasury at the close of the year 1906.

### SEALER OF WEIGHTS AND MEASURES.

By virtue of the provisions of Title 71 of the Revised Statutes, the State Auditor is made ex-officio State Sealer of Weights and Measures.

The standard of weights and measures adopted by the Government of the United States has been accepted as

the legal standard of weights and measures in this State.

As provided, the County Clerk of each county shall be ex-officio the sealer of weights and measures of the county, and shall have the care and custody of the county standards. He shall procure at the expense of the county a full set of weights and measures, scales and beams, which he shall cause to be tried, proved, and sealed by the State Standards, under the direction of the State Auditor.

My predecessor in his last biennial report made the statement that as nearly as he could ascertain, there was not a county in the State which had been provided with these standards; if so, he was not aware of it.

Since my incumbency, and to this date, there have been two counties in the State that have complied with this law.

Under the present prevailing conditions, the little regard paid, and its being practically a dead letter upon our statute books, I can only reiterate what has been recommended by former officials, that the Act be amended so as to make it mandatory upon all concerned, or else it should be repealed.

### STATE WARRANTS.

As the law now provides all State warrants issued by the State Auditor, and having been paid by the State Treasurer, shall remain in his possession. I therefore recommend that provision be made that all State warrants now with the State Treasurer subsequent to January 1, 1905, be returned to the State Auditor, and upon surrender of said warrants the State Auditor shall give his receipt therefor.

I also suggest that paragraph 5 of Section 2428, Revised Statutes of Utah, 1898, be amended by striking out the words "and to file and preserve the same," and inserting in lieu thereof the words, "and to file with the State Auditor on the last day of each month."

### MARKS AND BRANDS.

This branch of the State department has been maintained along the same line as that instituted and followed

by my predecessors in office, and has not been a burden upon the State, as the receipts derived from this department have been more than sufficient to meet the current expenses.

During the period of time this law has been in operation there has been a steady increase in the number of applications for marks and brands, which is indicative of its becoming more stable and popular among the stockmen of the State.

As the law provides, I have caused to be published a yearly pamphlet, embracing all marks and brands recorded between October 1, 1904, and October 1, 1906, copies of which have been forwarded to the clerks of the various counties for distribution as provided by law.

Since the enactment of this law there have been recorded about 3430 marks, and upwards of 9370 brands, and the records are quite, if not all, free from duplication on conflict. However, we are nearing the limit in the matter of recording marks, it being almost impossible to find one suitable without infringing upon the rights of others, hence I would recommend that this part of the law be repealed, unless some equitable solution can be advanced.

Respectfully submitted,

J. A. EDWARDS,

State Auditor.
